Good to Great Jim Collins 2011-07-19 The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the

histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?

In the Loop David R. Johnson 2020-10-06 In the Loop: A Political and Economic History of San Antonio, is the culmination of urban historian David Johnson's extensive research into the development of Texas's oldest city. Beginning with San Antonio's formation more than three hundred years ago, Johnson lays out the factors that drove the largely uneven and unplanned distribution of resources and amenities and analyzes the demographics that transformed the city from a frontier settlement into a diverse and complex modern metropolis. Following the shift from military interests to more diverse industries and punctuated by evocative descriptions and historical quotations, this urban biography reveals how city mayors balanced constituents' push for amenities with the pull of business interests such as tourism and the military. Deep dives into city archives fuel the story and round out portraits of Sam Maverick, Henry B. Gonzales, Lila Cockrell, and other political figures. Johnson reveals the interplay of business interests, economic attractiveness, and political goals that spurred San Antonio's historic tenacity and continuing growth and highlights individual agendas that influenced its development. He focuses on the crucial link between urban development and booster coalitions, outlining how politicians and business owners everywhere work side by side, although not necessarily together, to shape the future of any metropolitan area, including geographical disparities. Three photo galleries illustrate boosterism's impact on San Antonio's public and private space and highlight its tangible results. In the Loop recounts each stage of San Antonio's economic development with logic and care, building a rich story to contextualize our understanding of the current state of the city and our notions of how an American city can form.

History Repeating Sam Wilkin 2018-03-15 Most of the time, politics is boring. In most countries, the Average Joe rules. Extremists of the left and right can gnash their teeth but serious politicians know they desert the centre ground at their peril. It's the iron law of electoral politics. That is, in normal times. What about times when the centre can't hold, when the extremists take back control and set about making their country great again? At such moments, the best guide to the future is the past. Political chaos might be scary but it isn't all that chaotic. In fact, as risk analyst Sam Wilkin reveals in History Repeating, it has hidden rules. Beneath the noise and confusion of history, from Lenin and Khomeini to Trump and Brexit, there are patterns. The same drama plays out again and again, with minor variations. It isn't the story you think you know. It contains surprises and profound mysteries. But once you have seen the inner logic of the past century's political disasters, you might just be ready to face the interesting times to come.

Baseball with a Latin Beat Peter C. Bjarkman 2010-07-27 Since Cuba's Esteban Bellan made his debut for the Troy Haymakers of the National Association in 1871, Latin Americans have played a large role in the major leagues. Nearly 15 percent of big league rosters are made up of Latinos, while the region's colorful and competitive winter leagues have been a proving ground for up-and-coming major league players and managers. Early Latin American stars were barred purely because of the color of their skin from playing in the major leagues. Players such as Jose Mendez and Martin Dihigo (the only player elected to the U.S., Cuban and Mexican halls of fame) made their marks on the Negro Leagues, turning the leagues' barnstorming tours into major attractions in many Caribbean countries. This history of the players and events that make up the rich tradition of Latin American baseball gives a unique insight to this long-neglected area of baseball.

Start with Why Simon Sinek 2011-12-27 The inspirational bestseller that ignited a movement and asked us to find our WHY Discover the book that is captivating millions on TikTok and that served as the basis for one of the most popular TED Talks of all time—with more than 56 million views and counting. Over a decade ago, Simon Sinek started a movement that inspired millions to demand purpose at work, to ask what was the WHY of their organization. Since then, millions have been touched by the power of his ideas, and these ideas remain as relevant and timely as ever. START WITH WHY asks (and answers) the questions: why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. START WITH WHY shows that the leaders who have had the greatest influence in the world all think, act and communicate the same way—and it's the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY.

Taylor Davis and the Clash of Kingdoms Michelle Isenhoff 2019-04-24 I would get stuck with an archenemy who won't stay dead... "Why do I have to pay a toll? No one else is forking out dough, you big baboon." I wouldn't recommend repeating those words to anyone who is dangling you a foot off the ground. My face suddenly felt like it had collided with a cement wall at forty miles per hour. I found myself sliding across the tile floor and coming to rest in the corner of the hallway. "You hit me!" I rubbed my jaw in disbelief. Damian had always seemed a level-headed sort of guy. "I can't believe you hit me!" "I'll do a lot worse than that!" A handful of spectators scrambled out of the way as he lunged for me. I dove behind a bench outside the high school office. The secretary never even looked up. I hoped word of my death in front of the wide, newly installed security window didn't leak out to the city's more violent criminal element... I just can't catch a break. Most of my friends only concern themselves with girls and grades, but I have to worry about retaliation from hellish warlords. When three of my classmates succumb to a strange malady, I become the target of irrational violence. Is it a coincidence, as Elena so firmly believes? Or could there be a deeper, more evil explanation? When the epidemic goes national, my team and I are called on to uncover the root of the problem before violence breaks out on a worldwide stage. Our quest leads us to the heart of Africa, to the underworld, and to a second encounter with an enemy who just won't stay dead.

Switch Chip Heath 2010-02-16 Why is it so hard to make lasting changes in our companies, in our communities, and in our own lives? The primary obstacle is a conflict that's built into our brains, say Chip and Dan Heath, authors of the critically acclaimed bestseller Made to Stick. Psychologists have discovered that our minds are ruled by two different systems - the rational mind and the emotional mind—that compete for control. The rational mind wants a great beach body; the emotional mind wants that Oreo cookie. The

rational mind wants to change something at work; the emotional mind loves the comfort of the existing routine. This tension can doom a change effort - but if it is overcome, change can come quickly. In *Switch*, the Heaths show how everyday people - employees and managers, parents and nurses - have united both minds and, as a result, achieved dramatic results:

- The lowly medical interns who managed to defeat an entrenched, decades-old medical practice that was endangering patients
- The home-organizing guru who developed a simple technique for overcoming the dread of housekeeping
- The manager who transformed a lackadaisical customer-support team into service zealots by removing a standard tool of customer service

In a compelling, story-driven narrative, the Heaths bring together decades of counterintuitive research in psychology, sociology, and other fields to shed new light on how we can effect transformative change. *Switch* shows that successful changes follow a pattern, a pattern you can use to make the changes that matter to you, whether your interest is in changing the world or changing your waistline.

The Future of Nursing Institute of Medicine 2011-02-08 The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Immunity to Change Robert Kegan 2009-02-15 Unlock your potential and finally move forward. A recent study showed that when doctors tell heart patients they will die if they don't change their habits, only one in seven will be able to follow through successfully. Desire and motivation aren't enough: even when it's literally a matter of life or death, the ability to change remains maddeningly elusive. Given that the status quo is so potent, how can we change ourselves and our organizations? In *Immunity to Change*, authors Robert Kegan and Lisa Lahey show how our individual beliefs--along with the collective mind-sets in our organizations--combine to create a natural but powerful immunity to change. By revealing how this mechanism holds us back, Kegan and Lahey give us the keys to unlock our potential and finally move forward. And by pinpointing and uprooting our own immunities to change, we can bring our organizations forward with us. This persuasive and practical book, filled with hands-on diagnostics and compelling case studies, delivers the tools you need to overcome the forces of inertia and transform your life and your work.

Renaissance & Seventeenth - Century Studies Joseph Anthony Mazzeo 2021-11-30 First published in 1964, *Renaissance & Seventeenth - Century Studies* contains essays which fall into two groups. The first four are concerned with problems of metaphor and style and treat two important eras in literary history when these problems underwent critical re-examination. St. Augustine marks the classical attempt to take account of "biblical poetics" while the two essays on the theory of the "metaphysical" style treat the attempt of seventeenth century critics to comprehend, at the theoretical level, the expansion of metaphysical possibilities that marked the "metaphysical" movement. The second group of essays are, in general, concerned with Machiavelli and Machiavellism and Andrew Marvell. However, they are again essentially concerned with the way in which crucial metaphors and idea-images serve as principles for organising experience both in Machiavelli's own writings and in that of work of Marvell which reflects his influence. The final essay "Cromwell as Davidic King", weaves together Machiavellian and Augustinian strands as they are manifested in the works of a poet of wit, the "various light" of whose mind responded harmoniously to the different currents of thought and taste these essays discuss. This book will be an essential read for scholars and researchers of literature, literary history, political philosophy, and philosophy in general.

Black Obsession Gregor Paul 2009 This thought-provoking book is a search for answers to the vexing phenomenon of why the world's undisputed greatest rugby team can't win the World Cup. It is an in-depth investigation that explores how societal change, combined with the arrival of professionalism, has impacted on the ability of the All Blacks to perform on the biggest stage. The entire development programme for professional players comes under scrutiny to determine why the system keeps failing at critical junctures. Every aspect of the game is examined: the changed motivations of players since money was introduced; the New Zealand Rugby Union's obsession with the World Cup; the failure to produce strong leaders; the consequence of the arrival of Generation Y; the fixation with style over substance in terms of how the All Blacks play; and how the influx of Polynesian players has altered the way the nation coaches the game. All of these factors are analysed, with conclusions drawn on how each has played a role in preventing the All Blacks from winning the World Cup since 1987. Running through the narrative are the thoughts of many of the men who played for the 1987 All Blacks. Some of the greatest names in All Black history - Sean Fitzpatrick, Alan Whetton, David Kirk, Grant Fox and Brian Lochore - give their thoughts on the key themes and compare and contrast the amateur and professional eras. The end result is a compelling and authoritative read that gives the most detailed and comprehensive answer to a question everyone has asked but no one has ever satisfactorily answered.

The CEO Next Door Elena L. Botelho 2018-03-06 NEW YORK TIMES AND WALL STREET JOURNAL BESTSELLER • Winner of CMI Management Book of the Year 2019 Based on an in-depth analysis of over 2,600 leaders drawn from a database of more than 17,000 CEOs and C-suite executives, as well 13,000 hours of interviews, and two decades of experience advising CEOs and executive boards, Elena L. Botelho and Kim R. Powell overturn the myths about what it takes to get to the top and succeed. Their groundbreaking research was the featured cover story in the May-June 2017 issue of *Harvard Business Review*. It reveals the common attributes and counterintuitive choices that set apart successful CEOs—lessons that we can apply to our own careers. Much of what we hear about who gets to the top, and how, is wrong. Those who become chief executives set their sights on the C-suite at an early age. In fact, over 70 percent of the CEOs didn't have designs on the corner office until later in their careers. You must graduate from an elite college. In fact, only 7 percent of CEOs in the dataset are Ivy League graduates--and 8 percent didn't graduate from college at all. To become a CEO you need a flawless résumé. The reality: 45 percent of CEO candidates had at least one major career blowup. What those who reach the top do share are four key behaviors that anyone can master: they are decisive; they are reliable, delivering what they promised when the promise it, without exception; they adapt boldly, and they engage with stakeholders without shying away from conflict. Based on this breakthrough study of the most successful people in business, Botelho and Powell offer career advice for everyone who aspires to get ahead. Based on research insights illustrated by real life stories from CEOs and boardrooms, they tell us how to: - Fast-track our career by deploying the career catapults used by those who get to the top quickly - Overcome the hidden handicaps to getting the job we want. - Avoid the 5 hazards that most commonly derail those promoted into a new role. For everyone who aspires to rise up through the organization and achieve their full potential, *The CEO Next Door* is an essential guide.
